The CDTC team works with adults who have a history of substance abuse and co-occurring mental health issues. The staff is multidisciplinary, composed of a part time Medical Director and Psychiatrist, fulltime Program Director, Nursing Director, Registered Nurse, Licensed Practical Nurse, Behavioral Health Counselors, Licensed Social Worker and part time therapists. The Registered Will Nurse will provide medication management; provide injections such as Tuberculin Skin Tests, monitor patient status prior to medication and after medication. The RN will work with the Medical Director in regards’ to assisting with physicals and health assessments as needed.
Some of the Nursing Responsibilities under the supervision of the Physician, Nurse Practitioner and or Program Director include but are not limited to:

• Check narcotic inventory at the beginning and end of each day.
• Assess patients for medication safety.
• Medication administration and monitoring.
• Assist with supervision of Licensed Practical Nurse.
• Communication with the medical, nursing, program directors, LPN and other clinical staff and providers to coordinate care and obtain information, reports and notes.
• Maintain a system to implement and control the administration of all medication as prescribed by MD.
• Maintenance of medication database and logs.
• Assistance with health assessments, physical examinations and screenings.
• Schedule patients for physical examinations with program physician’s assistant or MD.
• Transcribe MD’s orders appropriately, including pharmacy pouring roster and medication administration sheet.
• Report and record any adverse reaction to drugs. Report and record any medication error. Complete incident/accident reports.
• Check medical supplies and reorder when necessary.
• Provision of health and treatment education and support to patients. Teach patients whenever necessary good health habits.
• Check all laboratory reports before they are filed and make appropriate referrals.
